

FIRST SET OF DOCUMENT AND INFORMATION REQUESTS OF
THE DEPARTMENT OF COMMUNICATIONS AND ENERGY TO
BOSTON GAS COMPANY, COLONIAL GAS COMPANY AND ESSEX GAS COMPANY
D/B/A KEYSpan ENERGY DELIVERY NEW ENGLAND

D.T.E. 04-62

Respondent: Ann Leary

Information Request DTE 1-14

- Q. Please explain the reasons why the combined peak CGA factor of \$0.7545 per ccf, calculations in Exh. KED/AEL-3a (Boston) at 1-12 and Exh. KED/AEL-3b (Essex) at 1-12 for Boston Gas Company ("Boston Gas") and Essex Gas, respectively, while the tariff units for these companies are in \$/therm as shown in Exh. KED/AEL-11. If this was due to an inadvertent error, please: (a) revise the applicable schedules to correct for such an error; and (b) accordingly revise the Company's response to information request AG-1-17.
- A. Lines 35 and 36 of Exhibit KED/AEL-2 were mislabeled. Line 35 should read \$/CCF and Line 36 should read \$/Therms. A revised Exhibit KED/AEL-2 is attached. Please note, however, that the factors provided in Exhibit KED/AEL-11 are correct.
